

My Success Story

First of all, I want to thank you for joining my subscriber list and putting faith in me to help you succeed online.

In the coming weeks and months I will be sending you some great free information, tools, software, how to guides, reports etc. all with one aim: To help you build an online business and reach the financial freedom I enjoy.

The main reason for this short biography is so you can get to know me a little better... Because after all, you wouldn't trust a faceless stranger!

Who Am I?

My name is James Jordan and I'm from England, I'm in my fifties and live in a small city with my wonderful wife. I have been running a successful online business for several years and really enjoy it.

Ever since leaving university in London, I've been involved in business/marketing working for several big companies in the city.

But as I hit middle-age the relentless workload and deteriorating work to life ratio was getting me down, to a point where I had to do something drastic, some would say it was my 'mid-life crisis' ;-).

So, many years ago now, I searched Google for 'make money online' or something similar and I was hooked! I was like a sponge, taking in all the info I could and learning about Internet marketing, online business and anything that could make me an income online.

Why I'm Successful?

Fast forward to today and I have been making a full-time income online for several years now, with the freedom of being my own

boss and having the financial security to do what I like, whether it's a 5* holiday on the other side of the world, buying a new sports car, or even paying off my daughter's student loan! The simple fact is, the Internet has allowed me to do this and you can make it happen too...

My knowledge of online business and IM is 2nd to none, from affiliate marketing to Wordpress, I have the know-how to help you learn and be successful in your Internet career.

My willingness to learn and TAKE ACTION is the #1 reason I have been successful online. Making money online is not difficult, as long as you follow proven systems and learn from people who know what their talking about. I have helped a countless number of people over the years build an Internet business and I want you to be the next!

It's Not All About The Money...

Sure I love waking up in the morning to see I've earned X amount of money while I've been asleep but to be honest, it's about more than that. I actually get a great feeling of satisfaction when helping other people succeed, seeing them reach the financial freedom they crave and the ability to quit their 9-5 job. To me that's what Internet marketing is all about.

Thanks for reading this biography and I hope you stick with me over the coming months, so I can really help you establish a true Internet business and the success you deserve...

P.S. I would be honoured if you added me as a [friend on Facebook](#).

James Jordan
